2019-20 College Loops Challenges

girls who
CODE

Get In The Loop

Get in the loop! Meet your CL members & learn about upcoming events. Join HQ to find out more about College Loops and Girls Who Code.

Sisterhood Challenge

Every day, you are changing the world. Advocate on your campus using the VAST framework & show the strength of our sisterhood.

Prototyping 101

What is your narrative? Craft and hone your personal pitch for interviews & networking. Plus, practice sharing technical solutions.

Pitch Perfect

What is your narrative? Craft and hone your personal pitch for interviews & networking.

Learn a New Language

Bring a syllabus from your hardest class & make a game to practice new concepts and languages. Support each other as you run into bugs and learn without the pressure of a grade.

Totally Tutorial

Don't just study for a class -- learn and practice a concept while filming a new tutorial to increase the representation of women in CS.

Tackle the Technical

Practice, practice, practice. Level up your technical interview skills with group workshops.

Behavioral Boss

Now that you've crafted your narrative, role play interviews utilizing the STAR method.

Hardware Hack

Sponsored by Digikey, complete earlier challenges to receive FREE hardware kits and tutorials this spring. Coming soon.

Open Source Of Course

In partnership with Tidelift, discover & explore open source projects this spring! Coming soon.

Own Open Source

Continuing with open source, learn how & why you should contribute to open source projects. Coming soon.

Celebrate (Final)

Happy end-of-the-year! Come together to beat the stress of finals, celebrate your accomplishments, and get an overview of exciting things to come next semester!
